

# QUALITY, HEALTH AND SAFETY AND ENVIRONMENT POLICY

The **DEPINS.A** Management team promotes and unconditionally supports the Quality, Health and Safety at Work and Environment Systems throughout the organisation. This Policy must be understood and accepted by all who form part of the organisation, Management being considered the first to lead and accept compliance of the directives described and undertakes to:

## QUALITY:

- Comply with all the requirements defined by our clients and other interested parties.
- Meet the individual needs of each client, contributing our know-how and providing the most suitable solutions in each case.
- Control and supervise the stages of our process.
- Act effectively before any incident and immediately inform the client.
- Be friendly and professional at all times.

## HEALTH AND SAFETY:

- Assess the working conditions and risks to improve the quality of work life of our personnel.
- Integrate occupational hazard prevention into the organisation through a comprehensive, integrated and participatory prevention, both in terms of harm and deterioration of health.
- Provide maximum protection to personnel in each job.
- Promote healthy practices in our organisation.

## ENVIRONMENT:

- Minimise environmental impact through the commitment of protecting the environment, conservation of natural resources and prevention of pollution, contemplated throughout the life cycle of our products and services.
- Promote actions with the objective of the 3Rs (Reduce, Reuse and Recycle).
- Guarantee continuous improvement in energy performance providing the necessary resources to optimise energy use and consumption.
- Promote environmental, social and economic sustainability, proximity and transparency on all our activities.
- Support the design and acquisition of energy efficient products and services.

*When client satisfaction and the safety and well-being of workers are improved, so are the results and profits for the organisation.*
